

RAVEN ROI:

Success with Lester Buildings

Lester Buildings is a leading manufacturer and builder of custom pre-engineered, post-frame building systems — built for farm, livestock, equine, hobby and commercial use. Located in Lester Prairie, MN, Lester Buildings is a privately held and locally owned company, employing generations of hard-working locals.

THE CHALLENGE

Implement a digital solution that accelerates continuous improvement in their factories and saves their teams time by automating their processes

THE SOLUTION

- ✓ Unlock improvement opportunities by accounting for 100% of production time and losses, using historic and real-time data
- ✓ Have a user-friendly interface that engages operators to provide information around downtime and losses, at the touch of a button
- ✓ Use real-time data visualizations and reports into machine-people performance to identify key opportunities for improving operations
- ✓ Notify supervisors and maintenance teams of real-time issues to eliminate bottlenecks as they arise

THE RESULTS

34%

Increase in revenue

28%

Reduction in labor costs to consumers

24%

Increase in salaries for plant workers
